RE: Fee Schedule change for 2017

Dear Design Professional:

Please review thoroughly as the **rates** and **nomenclatures** have changed. We will only consider extenuating circumstances on a case-by-case basis. **Effective Rate Change** for designs receiving design approval and construction approval after the referenced date (**April 20, 2017**). The **NYCEP** design approval/construction approval will still be required before any payment will be made. Any design approval/construction approval before the effective date will be payable at the 2016 rate. Enclosures further describe the **Effective Rate Change**.

If you have any questions about design classifications or need clarifications, please feel free to contact us at 845-586-1400 or at the above referenced address. We will be glad to discuss it.

Thank you for your cooperation

Respectfully,

Leo LaBuda  
Environmental Engineering Spls.

**CONVENTIONAL DESIGN:** further described as; design, permitting, coordination, stake out, topographic work, and construction supervision for a conventional, shallow trench/beds, simple raised trench/bed systems. Systems that include simple ground water controls such as curtain drains, swales, as further may be outlined by State Sanitary Code (10 NYCRR Appendix 75-A),

Site investigation: \$400.00, including but not limited to perc tests, deep tests, well locations, watercourse, and any other investigations required to complete the design parameters. Payment will be made upon completion of the necessary work.

Design: \$1,600.00 will include but not limited to design, permitting, coordination, plan preparation, distribution, and any other work required to obtain an approved plan. Payment will be made upon issuance of a **NOTICE OF DESIGN APPROVAL** by NYCEP.

Construction supervision \*: \$700.00, including but not limited to all the work required to inspect, approve, and certify the construction related to the septic design. Payment will be made upon issuance of **CONSTRUCTION APPROVAL** by NYCEP.

\* Construction supervision cost will not be allowed if the engineer or entity owned or controlled or employing the engineer, is also constructing the septic system.

**MODIFIED CONVENTIONAL:** further described as; design, permitting, coordination, stake out, topographic work, and construction supervision for a septic system with modifications, including systems requiring major grading modifications. Sites that incorporate Eljen-in drain type systems, infiltrator chamber type systems, Presby Geo-flo, E-Z Flows, Orenco type systems, complex cut/fill systems. Complex groundwater control systems above curtain drains, and swales. As further may be outlined by Sanitary Code (10 NYCRR Appendix 75-A)

Site investigation: \$400.00, including but not limited to perc tests, deep tests, well locations, watercourses and any other investigations required to complete the design parameters. Payment will be made upon completion of the necessary work.

Design: \$1,850.00, including but not limited to design, permitting, coordination, plan preparation, distribution, and any topographic work required to obtain an approved plan. Payment will be made upon issuance of a **NOTICE OF DESIGN APPROVAL** by NYCEP.

Construction supervision \*: \$800.00, including but not limited to all the work required to inspect, approve, and certify the construction related to the septic design. Payment will be made upon issuance of **CONSTRUCTION APPROVAL** by NYCEP.

\* Construction supervision cost will not be allowed if the engineer or entity owned or controlled or employing the engineer, is also constructing the septic system.

**ALTERNATE SEPTIC DESIGN:** further described as; design, permitting, coordination, stake out, topographic work, and construction supervision for enhanced designs such as; ATU (Aerobic Treatment Unit) systems, pump/siphon systems, sand filters, evapo-transpiration systems, peat filters, Advanced Envrio-Septic type Systems, including complex groundwater type control structures As further may be outlined by Sanitary Code (10 NYCRR Appendix 75-A) or as approved by the regulatory agency.

Site investigation: \$400.00, including but not limited to perc tests, deep tests, well locations, watercourse locations and any other investigations required to obtain an approved plan. Payment will be made upon completion of the necessary work.

Design: \$ 2,150.00, including but not limited to design, permitting, coordination, plan preparation, and distribution and any work required to obtain an approved plan. Payment will be made upon issuance of a **NOTICE OF DESIGN APPROVAL** by NYCEP.

Construction supervision \*: \$900.00, including but not limited to all the work required to inspect, test, approve, and certify the construction related to the septic design. Payment will be made upon issuance of **FINAL CONSTRUCTION APPROVAL** by NYCEP.

\* Construction supervision cost will not be allowed if the engineer or entity owned or controlled or employing the engineer, is also constructing the septic system.
